

Math Summer Work 2023

5th Graders going into 6th Grade

Each week you will need to work on each IXL code for 20-30 minutes and work on multiplication or division facts. To practice your facts, you can use flashcards, workbooks, IXL codes (provided below) or use an online math game. Use the chart below to document your progress on your summer work. If you master any of the required IXL codes, additional codes are provided below to practice skills we have worked on this year. Every week your parents need to check your progress and sign stating you have completed the assignment.
