

# Math Summer Work 2026

## Entering 4th Grade

Each week you will need to work on each IXL code working towards a SmartScore of at least 85. You will also have to complete weekly practice on multiplication and/or division facts. To practice your facts, you can use flashcards, workbooks, IXL codes (provided below) or use an online math game. Use the chart below to document your progress on your summer work. If you master any of the required IXL codes, additional codes are provided below to practice skills we have worked on this year. Every week your parents need to check your progress and sign stating you have completed the assignment.

6/16: Week 1 - Adding Three-Digit Numbers							
IXL 8XG	Score:	IXL LYB	Score:			Facts Practice	Method:
